ENGINEERING

ABOUT US

KMS ENGINEERING is a fast growing circle, flanges manufacturing company in India with focus on meeting today's advanced technology. Since our establishment in the year 2016, our core value has been honesty, transparency and integrity, which further assists in attaining the proud membership of Steel Chambers. All our manufacturing practices are directed towards offering quality products at highly competitive prices and in stipulated time frame. Further, our team of trained and dedicated professionals put all their hard work in building the unbreakable relationship with valued customers.

We are the manufacturer of circles, squares and flanges of material Mild Steel. We provide quality products in various thickness and standards. We have also our ship breaking unit at Alang, named Rushil Industries Ltd. (since 1995). We believe in quality products and on time delivery.

OUR INFRASTRUCTURE FACILITIES

We have sound infrastructure which ensures smooth and voluminous productivity. It is equipped with latest tools and technology to fabricate the product as per the demand of the clients. Our unit sprawls across the wide area and has large installation capacity. It is manned by expert technicians and engineers who are well versed with the operation of the unit and have the necessary expertise to utilize the maximum capacity of the plant.

Our manufacturing department is installed with following machinery:

- Lathe machine
- Cutting machine
- Drill machine
- Press machine
- Escorts Hydra Crane

WHY KMS?

We are providing an extensive range of products to our customers. Our products are immensely well-liked due to their top features. We have a dedicated team of experts who make a faultless range of products. Our distribution network helps in catering products in every nook and corner of country as we have:

- Wide distribution network
- Widespread market presence
- International quality standard range
- Customer-centric approach
- Competitive price

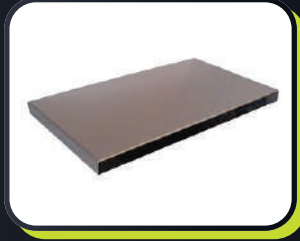

OUR PRODUCTS

M.S. CIRCLE & M.S. SQUARE

We offer best quality circle and square cutting in material of Mild Steel. The range of thickness varies from 6 MM to 90 MM and more. M.S. Circles and M.S. Squares are widely demanded in pipe fitting sectors, automobile industries, diamond industries, marine & shipping industries etc. We provide accurate and fine finishing of the cutting.

M.S. FLANGE

We are engaged in manufacturing and supplying a wide assortment of Flanges. Designed with utmost precision, these flanges perfectly meet the international quality standards. Manufactured using optimum quality raw material and latest technology, these undergo defined tests to make sure their flawless performance. Reliability, dimensional accuracy, robust design durability, excellent performance and corrosion resistance are some of the salient features of our offered flanges. We offer these flanges at most economical price range to our valuable clients. Flanges are the pioneer part of pipeline fittings. Mainly chemical industries, shipping & marine sectors, fertilizers industries, petroleum industries, water treatment plants are the relevant scopes of this product.

TYPES OF FLANGES

SLIP ON FLANGE

BLIND FLANGE

HUB/COLLER FLANGE

SOCKET WELD FLANGE

LAP JOINT FLANGE

WELDNECK FLANGE

STANDARD OF FLANGES:

AS PES CLASSES OF ASA (ANSI B16.5)
AS PER DIN TABLES
DIN FLANGES WITH PN RATING

AS PER IS 6392 TABLES
AS PER BS 10 TABLES
AS PER API CLASSES

AS PER BS 4504 TABLES
AS PER IS 1538

OUR VISION

To offer top-notch quality steel products in various sizes and types to most of the markets around the world, within the stipulated time frame.

OUR MISSION

We are determined to improve productivity and focus continuously on innovation and upgradation of our products & people. Our mission is to provide the leadership that will transform tomorrow.
